

Registration and Listing with LAHousingSearch.org

As a participant in the Small Rental Property Program, you will be required to list your property on LAHousingSearch.org, a free listing service that enables you to describe your property in great detail for prospective tenants. You are encouraged to list the availability of your property as soon as you have executed this commitment letter. Unless the lease for a unit receiving an incentive award was signed prior to the date of this commitment letter, you are required to list the property with LAHousingSearch.org not later than 30 days prior to your executing a lease with a tenant.

You may register your property on www.LAHousingSearch.org, or by calling 1-877-428-8844. A toll-free, bilingual call center is available Monday through Friday to you and to potential tenants for assistance with listing and searching for properties. TTY callers use 711 relay or 1-800-846-5277.

This is a free service to help residents find affordable housing throughout the state of Louisiana, but in particular the southern coastal parishes impacted by Hurricanes Katrina and Rita. The service currently serves over 600 searches for housing in Louisiana daily!

All those with residential rental units seeking to receive funds from The Road Home Small Rental Property program must register the property with LAHousingSearch.org prior to disbursement, whether they are currently occupied or in the process of securing a tenant for the property. The service handles updates to allow landlords/property owners to register basic property information initially and then modify information as needed when construction is near completion.

Properties can be de-activated on the website as soon as they are occupied to help you avoid additional phone calls, and properties can be re-activated at any time in the future when you are again seeking a tenant. Re-activation and updating of listings can be accomplished by visiting www.LAHousingSearch.org or by calling the toll-free call center at 1-877-428-8844.
